Pipe Brands / Makers - Pipedia

CIPP is used to rehabilitate existing water mains by lining the walls of the existing pipe with a hardened synthetic fiber tube.

Hardening of the resin-

Download File

PDF C Pipe

soaked fiber tube is achieved using steam or hot water, depending on the specific manufacturer's process.

The cleaning of the existing pipeline has to be completed prior to surveying the laterals.

Once the liner is completely cured, the laterals are reconnected by cutting and reaming the liner with
