

Serial Eeprom Cross Reference Guide

Yeah, reviewing a ebook **serial eeprom cross reference guide** could mount up your close associates listings. This is just one of the solutions for you to be successful. As understood, attainment does not recommend that you have wonderful points.

Comprehending as well as conformity even more than additional will pay for each success. adjacent to, the declaration as well as perception of this serial eeprom cross reference guide can be taken as with ease as picked to act.

~~Acces PDF Serial Eeprom Cross Reference Guide The Microchip Technology Inc. 24LC04B is a 4Kb I2C™ compatible Serial EEPROM. The device is organized as two blocks of 256 x 8-bit memory with a 2-wire serial interface. Low-voltage design permits operation down to 2.5V, with standby and active currents of only 1 μ A and 1 mA, respectively.~~

Serial Eeprom Cross Reference Guide

Summary. The Microchip Technology Inc. 24AA128/24LC128/ 24FC128 (24XX128*) is a 16K x 8 (128 Kbit) Serial Electrically Erasable PROM (EEPROM), capable of operation across a broad voltage range (1.7V to 5.5V). It has been developed for advanced, low-power applications such as personal communications or data acquisition.

24LC128 - Memory

The above Cross Reference Search is designed to be used as a guide for basic product information and for reference only. It is not intended to provide comprehensive product specifications and/or feature comparisons.

Macronix - Cross Reference Search

The Microchip Technology Inc. 25AA640/25LC640 (25XX640*) is a 64 Kbit Serial Electrically Erasable PROM [EEPROM]. The memory is accessed via a simple Serial Peripheral Interface (SPI) compatible serial bus. The bus signals required are a clock input (SCK) plus separate data in (SI) and data out (SO) lines. Access to the device is controlled through a Chip Select (CS) input.

25C640 - Memory

EPROM Cross Reference Guide. 1996 Microchip Technology Inc. DS11178D-page 1. Microchip provides a wide selection of EPROM devices, both from a density and a packaging stand- point. If you are interested in a part that is not listed in this book, please refer to the Microchip data book, or contact your local distributor or sales representative for assistance.

EPROM Cross Reference Guide

General Guidelines: 1. The "93" designator in the EEPROM part numbers specifies a 3-wire serial interface. 2. The "06" designator in the EEPROM part numbers specifies a 256-bit device. 3. The "46" designator in the EEPROM part numbers specifies a 1K device. 4.
